Just took a quick look at the "IAP" - so it's generated by the REOC - a bit odd as it has Ostrander as the IC. Also the email reference to Area Command is curious - has an AC been set up prior to actual field ICPs? I'm guessing not and they are confusing terminology. In my opinion, setting up an AC is probably not necessary and premature. An AC would be needed if we find resource needs to become competitive due to geography/availability.

Again my two cents, we should encourage r8 to standup an ICP close to the impacted area (hopefully they are doing that).

How can help?

Subject: R8 IAP for Gold King Mine Release

Hi Harry/Althea,

We've developed a modified R8 Incident Action Plan (IAP), and want to get your thoughts on how we need to coordinate on this. Does it need to go through Area Command? Do you want us to add info for your regions in addition to what we have? The document is very bare bones at this point, and will be improving over the coming days. Let us know asap so we can continue with distribution! Thanks!
